WORK EXPERIENCE

Aurionpro Solutions

Software Developer Apr 2022 - Present

- Developed and optimized React.js-based frontends for multiple projects, ensuring a seamless and responsive user experience.
- Implemented interactive data visualizations using Recharts to enhance analytical insights and decision-making.
- Integrated rich text editors (Quill.js) to enable dynamic content creation and editing.
- Utilized xlsx library for generating and managing Excel reports, improving data export efficiency.
- Implemented PDF viewers (custom) for seamless document access, enhancing user accessibility.
- Enhanced state management with **Redux**, improving application performance and maintainability.
- Collaborated with backend teams for efficient **REST API integration**, ensuring smooth data flow and minimal latency.
- Optimized UI performance through lazy loading, code splitting, and cross-browser compatibility enhancements.

JForce Solutions

Software Developer

Dec 2021 - Mar 2022

- Contributed to the successful launch of the NMIMS Portal, focusing on user-centric design and responsive web development.
- Actively participated in the project lifecycle, from requirements gathering to deployment, ensuring adherence to best coding practices.

PROJECTS

FasalRin [7]

- Led the development of **React.js-based frontend**, ensuring a seamless and intuitive user experience.
- Implemented responsive UI/UX using modern CSS frameworks like Bootstrap for enhanced accessibility.
- Integrated **Recharts** for **interactive data visualizations**, making complex data insights easily understandable.
- Worked with **rich text editors** like **Quill.js** to enable advanced text editing features.
- Utilized xlsx library to generate and manage Excel reports, streamlining data export functionality.
- Integrated PDF viewers (e.g., custom) for seamless document viewing and downloading.
- Optimized **API integrations** to streamline real-time data fetching and improve performance.
- Enhanced **state management** using **Redux** for efficient data handling.
- Collaborated closely with backend developers to integrate **REST APIs** efficiently.
- Ensured cross-browser compatibility and optimized performance, reducing load times

PMFBY [7]

- Developed and maintained key UI components for the PMFBY web applications using React.js.
- Worked on improving dashboard performance and data visualization using Chart.js.
- Integrated secure authentication flows and role-based access control for enhanced security.
- Debugged and optimized existing **React components**, reducing unnecessary re-renders and improving efficiency.

FFTS [

- Designed and implemented interactive front-end elements for FFTS using React.js & TypeScript.
- Optimized frontend workflows and enhanced UI performance through lazy loading and code splitting.
- Improved user experience (UX) by implementing modern UI enhancements and fixing usability issues.

SKILLS

- React Js, Next Js
- JavaScript, TypeScript
- HTML5, CSS3, Tailwind CSS
- Ant Design, Bootstrap
- Git, GitHub, Bitbucket

EDUCATION

Vidyalankar Institute of Technology

Bachelor of Engineering (B.E)

2018 - 2021
